New

You can now:

- Correctly detect and identify devices using secure connections.
- Use secure websocket connection when communicating with a device in secure mode
- Use unsecure websocket connection for a device that is not in secure mode
- Older devices (pre M406), will still connect using the old TCP 10001 ethernet socket connection
- Added 3 retries when attempting to connect and login to a device.

- Use CORIOdiscover to update firmware on a CORIOmatrix or CORIOmatrix mini to firmware versions M406 or later.

Fixed

- None

Notes

- None
