## EUROPEAN UNION'S (EU) REACH REGULATION SHVC CERTIFICATE OF COMPLIANCE

The European REACH Regulation (EC) No 1907/2006 deals with the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH), Annex XVII entered into force in June 2007, and affects all companies producing, importing, using, or placing products on the European market. The aim of the REACH regulation is to ensure a high level of protection of human health and the environment from chemical substances.

tvONE substances management system follows and complies with the current revision of the REACH Regulation on the substances as identified by ECHA (European Chemical Agency).

tvONE products are considered "ARTICLES" as defined in REACH Article 3 (3). These products/articles under normal and reasonable conditions of use do not have intended release of substances. Therefore, the requirement in REACH Article 7 (1) (b) for registration of substances contained in these products/articles does not apply.

tvONE products/articles, do not contain Substances of Very High Concern or if there are SVHC in the product/article, the content is less than the 0.1% (wt/wt) as defined by REACH Article 57, Annex XIV, Directive 67/548/EEC. Therefore, the requirement in REACH Article 7 (2) to notify ECHA if a product/article contains more than 0.1% wt/wt of an SVHC and tonnage exceeding 1 tonne per importer per year is not applicable.

tvONE operations do not manufacture or import chemicals, therefore tvONE has no obligation to register substances.

tvONE provides this statement, referencing the SVHC List released by ECHA, 23rd January 2024, containing 240 substances.

The most recent SVHC list can be accessed through this link: <https://echa.europa.eu/candidate-list-table>

Signed:

David Reynaga, Chief Technology Officer
