

# CORIOmaster<sup>®</sup> micro edge-blend application

Up to four sources projected with window animations and live transitions.

Create powerful, multi-source presentations on expansive projector edge-blends. Here, four sources are displayed onto a large projection screen with a dual projector set up using a CORIOmaster micro which provides flexible, modular configurations. This example uses DVI and HDBaseT modules to connect local HDMI laptops and remote cameras using HDBaseT that allow both analog and digital signal processing together with low latency live content. Apply easily created live transitions and window animations to your presentation to really captivate your audience.

## Equipment list

**Computer with current Windows operating system and network cable for set up and system programming using CORIOgrapher.**

- 1 x CORIOmaster micro (C3-503)
- 1 x Dual DVI/HDMI input module (CM-DVIU-2IN)
- 1 x Dual HDBaseT input module (CM-HDBT-2IN-1ETH)
- 1 x Dual HDBaseT output module (CM-HDBT-2OUT-1ETH)
- 1 x S/PDIF to analog converter (1T-AP-299) for room audio system
- 2 x HDMI to DVI adaptors (CMD1941)
- 2 x Magenta HD-One HDBaseT Transmitter (2211093-02)
- 2 x Magenta HD-One HDBaseT Receiver (2211094-02)
- 1 x Projector Screen
- 2 x Projectors, cables and mounts
- 4 x Sources and cables
